

Grand Opening – January 4, 2021

Lakewood Wound Care Clinic

Additional Clinic Location Serving Your Community

Our Services

We provide surgical and wound care for all wound issues (pressure, diabetic, vascular, traumatic, post-operative). Additionally, our surgeons are available to treat most minor surgical issues, such as

- Abscess drainage
- Skin lesion/mass biopsy
- Vascular doppler studies
- Place/assist/instruct on use of VAC and UNNA boot therapies
- Replacement of gastric, suprapubic, and tracheostomy tubes.

All these procedures are performed at the clinic, by the provider, which reduces additional referrals out for care decreasing the overall cost and inconvenience for the patient and payor sources.

We understand that continuity of care and open communication with the patient's PCP, Surgeon, and Family are imperative to good healing outcomes, so we foster an open line of communication (within HIPAA guidelines) to ensure that continuity is maintained throughout the patient's treatment with us.
